

EUROLASTIC TC 30 G **traffic**

NEW

First fast-acting polysulphide joint sealant with DIBt
(German Institute of Building Technology) national
technical approval

FAST

DURABLE

APPROVED

EUROLASTIC TC 30 G traffic

Approved, highly chemical and weather-resistant 2-component polysulphide sealant with very fast curing

SYSTEM FEATURES

- Chemical-resistant
- May be traversed by pneumatic and vulcanised tyres
- 35 % approved total deformation
- Outstanding cold elasticity
- High notching resistance
- High UV and weathering resistance
- Tack-free, even at high temperatures
- High ageing resistance
- Very fast curing
- Complies with: ZTV Fug StB | DIN EN 14188-2
- National technical approval

>> FULLY CURED AND TRAVERSABLE <<

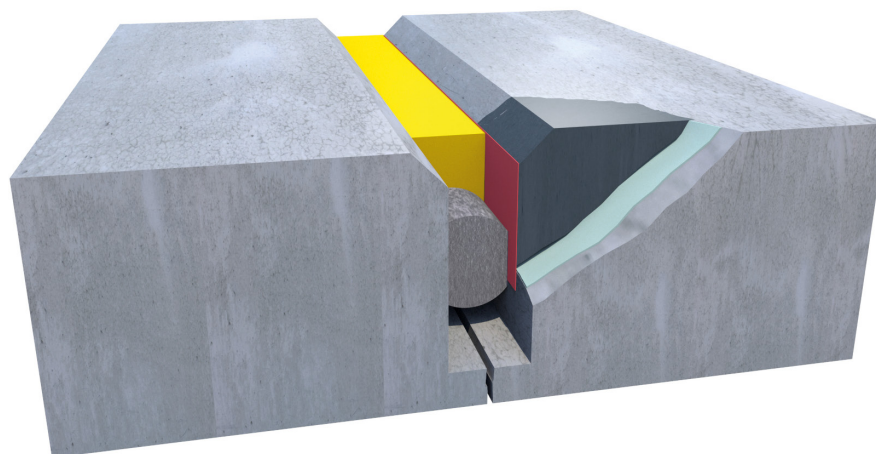

Deutsches

für
Bautechnik

DIBt

National technical approval

- Joint sealant: EUROLASTIC TC 30 G traffic
- Primer: EUROLASTIC Primer U 12 G traffic

- Mortar: EUROREPAIR PC 96 super fast
- Primer: EUROREPAIR HG 96 super fast

■ Backing material: Round PE cord (closed-cell)

**SPECIALLY DESIGNED FOR AIRCRAFT GROUND SURFACES
FAST AND DURABLE**

EUROREPAIR PC 96 super fast

Highly accelerated, 2-component epoxy resin mortar with super fast hardener for re-profiling edges

SYSTEM FEATURES

- May be traversed by pneumatic and vulcanised tyres
- Adjustable curing times
- Same modulus of elasticity as roadway concrete
- Very high compressive strength
- Easy application
- Water-impermeable
- MEB and TP-BEB RH-StB O2 compliant
- Chemical-resistant
- Premixed
- Pre-pigmented
- Variants approved by DIBt: EUROREPAIR PC 96 WHG

☐ I seek technical advice

☐ Please send me your current catalogue and price list

Please send me additional information about:

☐  **Areas subject to German Water Resources Act**
Storage, filling and handling facilities for water-polluting substances Fuelling areas, de-icing areas, filling stations, refineries, tank farms, facilities for production, treatment and use of water-polluting substances

☐  **Traffic areas**
Roads/ motorways, concrete barriers, parking garages, warehouse and logistics areas

☐  **Aircraft Movement Areas**
taxiways, runways, de-icing areas, fuelling areas

☐  **Parking areas**
Parking garages, underground garages

☐  **Wind power and agriculture**
Areas for the storage and filling of liquid manure, manure, silage effluent, and solid dung, wind turbines, biogas plants, stable areas, horizontal silos

☐  **Railway lines**
trams, loading ramps

☐  **Industrial and trade areas**
Storage areas, scrap yards, logistics areas, production areas, with areas used by forklifts

☐  **Construction**
Facades, balconies, joints, precast concrete apartment buildings
