

EUROLASTIC TC 30 G grey

Approved 2-component polysulphide sealant for increased installation depths up to 1.6 times the joint width

Area of application

- for indoor and outdoor use
- for storage, filling and handling facilities for water-polluting substances, filling stations, air and road traffic areas, production and storage areas

Product characteristics

- cold elasticity to -40°C
- highly chemical resistant, e.g. to fuels, oils, aircraft fuels, deicing agents and numerous other media in accordance with the chemical resistance list
- very high UV, weathering and ageing resistance
- excellent resistance to notching and wear
- approved total deformation 25 %, recovery capability > 90 %
- the sealant can be installed in thicknesses from
 0.8 to 1.6 times the joint width

construction chemicals

| Substrate preparation | The substrate temperature must be between +5°C and +35°C, and the temperature of the bonding surfaces must be at least 3°C above the prevailing dew point temperature. At the time of jointing, the bonding surfaces must be clean, free of oil and grease, dry and free of substances that could prevent adhesion. |
|------------------------|--|
| Backing | The joint space must be tightly and firmly backed with closed-cell polyethylene backer rod. The rod must not be damaged during application. |
| Primer | Basically, EUROLASTIC TC 30 G may only be applied to primed bonding surfaces. Absorbent substrates: EUROLASTIC Primer U12G Non-absorbent substrates: EUROLASTIC Primer S2 Bare steel and galvanised surfaces: EUROLASTIC Primer ZM after curing EUROLASTIC Primer S2 must be applied. See primer matrix for further information |
| Application conditions | Material temperature for manual processing: min. +10°C, max. +25°C Material temperature for mechanical processing: min. +10°C, max. +60°C |
| Handling | EUROLASTIC TC 30 G is supplied with the correct ratio of components A and B. Add all of component B to component A and mix thoroughly with a slow stirrer at approx. 300 rpm. The mixing process must be carried out until a homogeneous, streak-free mixture forms. Do not mix for less than 3-5 minutes. Place the mixture in a hand-held caulking gun or insert the container into a pressure tank with a hose and nozzle. The joint chamfer must not serve as a bonding surface when sealing the joint. Air bubbles that form on the surface following installation can be removed during the sealant |

The joint sealant installation must be carried out in accordance with CUAP (Common Understanding of Assessment Procedure) "Joint Sealant Systems" – see DIBt European technical approval.

processing time by gentle brushing with a dry, soft brush.

construction chemicals

trafficable joint assembly

non-trafficable joint assembly

a = chamfer face (3 to 10 mm)

b = joint width (10 to 20 mm trafficable, non-trafficable up to 40 mm)

d = joint sealant thickness

dH = joint sealant adhesion or contact surface on the joint flank; dH = d + 0.5 b

t = depth of joint slot

Joint Design Dimensions

| Trafficable with pneumatic tyre vehicles | | | | |
|--|----|----|----------------|--|
| | b | d | d _H | |
| min. | 10 | 10 | 15 | |
| max. | 20 | 20 | 30 | |

| Non-trafficable | | | |
|-----------------|----|----|----|
| | b | d | dн |
| min. | 10 | 10 | 15 |
| max. | 40 | 40 | 60 |

Cleaning

Fresh material can be removed from the tools with EUROLASTIC Cleaner G. Fully cured material requires mechanical cleaning.

| Packaging | EUROLASTIC TC 30 G is delivered in 4 l, 10 l, 20 l and 200 l containers. |
|-------------------------------|--|
| Storage and shelf life | Store in a cool, dry place (+10°C to +25 °C). Under these conditions, the shelf life of unopened and undamaged original containers is 12 months. |
| Tests/ Approvals/Standards | EUROLASTIC TC 30 G complies with the European technical approval granted by DIBt (German Institute of Building Technology): Z-74.6-128 And the tests of: TL-Fug StB 01/ ZTV-Fug StB 01 DIN EN 14188-2 |

Special instructions/protective measures

EUROLASTIC TC 30 G may only be processed in well-ventilated areas. Suitable protective clothing must be worn when working. Waste and containers must be disposed of in a safe manner. Avoid release into the environment. Completely empty containers can be returned to the KBS/Interseroh circulatory system.

The instructions in the corresponding safety data sheet must be strictly adhered to.
